PROFESSIONAL SUMMARY

Software Engineer (Frontend / Fullstack) specializing in React and TypeScript applications with Node.js/Express backends. Reduced page load times by 35% and migrated 3 apps from CRA to Vite, cutting build times from 45s to 3s. Experienced building accessible component-driven UIs with focus on Core Web Vitals, functional testing and CI/CD deployment pipelines.

TECHNICAL SKILLS

Frontend:	React.js • TypeScript • JavaScript (ES6+) • Next.js • HTML/CSS • Vite • ESLint
Backend:	Node.js • Express.js • REST API Design
Styling & UI:	Tailwind CSS • Framer Motion • Responsive Design • WCAG Accessibility
Databases:	MySQL • MongoDB
Tools & Platforms:	Git • GitHub • JIRA • Figma • Lighthouse
DevOps & CI/CD:	GitHub Actions • Vercel • Render
Performance:	Code-splitting • Lazy loading • Core Web Vitals • useMemo/useCallback optimization
State & APIs:	Context API • RESTful APIs • JWT Authentication • Redux Toolkit
Testing:	Functionize • Manual Testing • Functional Testing

WORK EXPERIENCE

Junior Software Engineer

Aug 2025 – Present

Innova Solutions

Hyderabad, India

- Improved frontend performance by reducing page load time from 3.2s to 2.1s by refactoring React state management patterns and implementing code-splitting with React.lazy across core application routes
- Accelerated build performance by migrating from Create React App to Vite, reducing development build time from 45s to 3s and production build time by 60% for 3 frontend applications.
- Built a reusable component library of 25+ React components with TypeScript interfaces, semantic HTML, and ARIA attributes, adopted across 3 product repositories to standardize UI patterns.
- Maintained application quality through functional testing using Functionize and structured manual test cycles, validating critical user flows including authentication, dashboard rendering, and form submissions before each release
- Enforced code quality standards by configuring ESLint/Prettier rules and authoring a GitHub Actions CI pipeline that runs automated lint checks on every pull request, contributing to zero rollbacks across 6 sprint cycles.

Software Development Engineer Intern

Oct 2024 – July 2025

Innova Solutions

Hyderabad, India

- Engineered TalentX, a recruitment platform serving 200+ daily users across 4 dashboards with real-time candidate tracking through 5 interview stages, translating Figma designs into React components using Context API and RESTful endpoints.
- Optimized Core Web Vitals by improving Largest Contentful Paint from 4.8s to 2.1s by identifying React re-render bottlenecks with React DevTools Profiler and implementing useMemo/useCallback hooks across 15 heavy components.
- Delivered 12+ production-ready features within Agile sprints across a 9-person cross-functional team, resolving 70+ JIRA tickets and conducting peer code reviews to maintain zero rollbacks

PROJECTS

ATS Resume Optimizer | React.js, Node.js, Google Gemini API, Tailwind CSS

[Live Demo](#)

- Built AI resume analyzer using Google Gemini API and Node.js streaming parsers (pdf-parse/mammoth), processing 500+ PDFs with <4s average parse time.
- Developed React dashboard for real-time resume editing with AI-powered bullet optimization and side-by-side diff comparison.

Talkify – Real-Time Communication Hub | MERN Stack, Socket.IO, Vercel, Render

[Code Link](#)

- Built a real-time messaging application with Socket.IO supporting instant message delivery, online status indicators, and typing presence across multiple chat rooms.
- Designed a mobile-first responsive UI with Tailwind CSS featuring custom theme support and accessible form components

3D Developer Portfolio | React.js, Framer Motion, Tailwind CSS

[Live Demo](#)

- Designed and published an immersive personal portfolio website implementing interactive 3D graphics rendering via Three.js and fluid scroll-bound element motion through Framer Motion.
- Optimized asset loading overhead to guarantee seamless interactive performance and responsive viewport mapping across both desktop and mobile form factors.

EDUCATION

Chitkara University (B.E. in Computer Science)

CGPA: 9.31/10.0, Top 5% of Graduating Class
