PROFESSIONAL SUMMARY

Fullstack & AI-integrated Software Engineer with 1+ year shipping production React/Next.js applications, LLM-powered products, and secure payment systems. Delivered measurable impact: 93% faster builds, 34% page load reduction, zero rollbacks across 6 sprints. Built real client products with Razorpay payment integration and server-side security architecture.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+) · TypeScript · Python
Frontend:	React.js · Next.js · Tailwind CSS · Framer Motion · Vite
Backend:	Node.js · Express.js · REST APIs · JWT Auth
AI / LLM:	Gemini API · Groq API · Prompt Engineering · Context Filtering · Streaming APIs
Databases:	MongoDB · MySQL
DevOps & CI/CD:	GitHub Actions · Vercel · Render · CI/CD
Performance:	Code Splitting · Lazy Loading · Core Web Vitals · Memoization
Testing:	Functionize · Selenium · Manual Testing

PROFESSIONAL EXPERIENCE (1+ YoE)

Junior Software Engineer

Aug 2025 – Present

Innova Solutions

Hyderabad, India

- Migrated 3 production apps from CRA → Vite, cutting build time from 45s → 3s (93% faster) and production builds by 60%
- Reduced page load time 3.2s → 2.1s (34%) via React state refactoring and route-level code splitting
- Built a 25+ component TypeScript design system adopted across 3 product repositories org-wide
- Shipped GitHub Actions CI pipeline enforcing lint/format checks — zero rollbacks across 6 sprint cycles

Software Development Engineer Intern

Oct 2024 – July 2025

Innova Solutions

Hyderabad, India

- Improved LCP 4.8s → 2.1s (56%) by profiling re-renders with React DevTools and memoizing 15 high-traffic components
- Delivered 12+ features and resolved 20+ JIRA tickets in a 9-member Agile team with zero production rollbacks
- Built TalentX recruitment platform with real-time candidate tracking dashboards

PROJECTS

Personal AI Assistant — React.js · Node.js · LLM API · Prompt Engineering

[Live](#)

- Developed a production-ready AI assistant powered by LLM APIs with streaming responses, conversation memory, and context-aware interactions..
- Engineered prompt-based guardrails, domain-specific knowledge restrictions, and input validation to improve response reliability and safety.
- Built a scalable React frontend and Node.js backend with a modular architecture for future support of RAG, tool calling, and multi-model routing..

Talkify – Real-Time Communication Hub | MERN Stack, Socket.IO, Vercel, Render

[Github](#)

- Built a real-time messaging app with Socket.IO delivering instant message sync, live typing presence, and online-status indicators across multiple concurrent chat rooms.
- Designed a mobile-first, accessible UI in Tailwind CSS with keyboard-navigable, screen-reader-friendly form components and custom theme support.

Rivanto Mattress — Secure E-commerce Platform | Next.js · Node.js · Razorpay · TypeScript · Tailwind CSS

[Live](#)

- Developed a production-ready e-commerce platform for a real mattress retailer, delivering a modern shopping experience with secure checkout and responsive UI.
- Architected a server-authoritative payment system where product prices are resolved exclusively on the backend, eliminating client-side price manipulation and checkout tampering.
- Implemented Razorpay payment integration with HMAC-SHA256 signature verification, timing-safe comparison, and server-side order validation before confirming successful transactions.
- Optimized the application using Next.js App Router, TypeScript, and Tailwind CSS, resulting in a scalable, maintainable, and high-performance codebase.

EDUCATION

Chitkara University (B.E. in Computer Science)

CGPA: 9.31/10.0, Top 5% of Graduating Class
